Summary

Computer Science undergraduate with strong problem-solving skills and hands-on experience in building **scalable RESTful web applications**. Proficient in **Java, JavaScript, Node.js, Express.js, MongoDB, and SQL**, with a solid understanding of **Data Structures, Algorithms, and backend system design**. Experienced in API development, authentication, and MVC architecture, with practical exposure to **Postman, Git, and database-driven applications**.

Education

Bachelor of Engineering (Computer Science)

Chitkara University, Punjab

2023 – 2027

CGPA: 8.94 / 10

Skills

Programming Languages: Java , JavaScript, SQL

Backend Technologies: Node.js, Express.js, RESTful APIs, MVC Architecture

Databases: MongoDB, MySQL

Frontend: HTML5, CSS3, Bootstrap, Responsive Web Design

Tools and Platforms: Git, GitHub, Postman, JWT Authentication, VS Code

Core CS Concepts: Data Structures and Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Soft Skills: Problem Solving, Fast Learner, Team Collaboration, Communication

Experience

Core Organizing Member – Ecolution

2024 – Present

Chitkara University, Punjab

– Led and coordinated **15+ members** across **5+ sustainability initiatives**, managing planning, task delegation, and execution.

Organizer – National Science Day

2024

Chitkara University, Punjab

– Managed event scheduling, volunteers, and on-ground coordination for student activities.

Hackathon Participant – Somnium Hackathon

2025

Chitkara University, Punjab

– Built a working prototype within **48 hours** in a **4-member team**.

– Contributed to problem analysis, feature design, and integration under strict time constraints.

Organizing Committee Member – ISCCSC

2025

International Conference, Chitkara University, Punjab

– Contributed to the successful execution of an international conference with **200+ participants** by handling registrations and speaker coordination.

Projects

MindEase - AI Mental Wellness Platform

GitHub (Node.js, Express.js, HTML, CSS, MongoDB)

– Developed an **AI-powered mental wellness platform** featuring chatbot-based emotional support, guided breathing, and stress management.

– Implemented **mood tracking, journaling, goal management**, and a personalized dashboard with weekly insights.

– Integrated backend APIs to securely handle user data and session management, ensuring reliable performance and data consistency across features.

Drive Me Crazy - Taxi Booking System

GitHub (Node.js, JavaScript, MongoDB, HTML, CSS)

– Built a full-stack **ride booking application** supporting user authentication and trip management.

– Implemented booking workflows and REST APIs using **Node.js and MongoDB**.

– Designed scalable backend using **MVC architecture**.

Nexa - Campus Management System

GitHub (Java, Spring Boot, MySQL, Thymeleaf)

– Developed a campus management system with **role-based access control** and dynamic dashboards.

– Applied MVC architecture with clean service-layer separation and normalized database design.

– Optimized database queries and backend logic to support multiple user roles efficiently while maintaining data integrity and performance.

Achievements

Winner – Youth Skill Mela for MindEase AI Mental Wellness Project

350+ Data Structures and Algorithms problems solved on LeetCode using Java

Participant – Hack The Mountains Hackathon 5.0 (2024)
